

It's Time to **Unlock the Possibilities** of Adaptive Authentication

Establish identity the easy way with **AwareID™**.

Lightning-fast IDV, MFA & biometrics on a single low-code platform.

THE PROBLEM:

You need to enroll and authenticate your customers quickly and easily with an exceptional user experience, while complying with changing rules and regulations. You need speed AND flexibility in a single platform.

THE SOLUTION:

AwareID™ uses next-generation adaptive authentication and identity verification for account openings, account logins, and account resets—all with cross platform biometrics creating a frictionless experience for clients and customers.

Identity Verification

- Secure enrollment and verification capability
- Rapid processing time for added convenience
- Capture and validation for 9,000+ identity documents worldwide

Multi-factor Authentication

- Offers multi-modal biometrics and cryptographic PIN
- Combine MFA options as you see fit
- Optimize the authentication experience for users

Single Low-Code Platform

- Intuitive and easy to use
- Avoids expensive IT development and hardware costs
- Customize the configurations if desired

Biometrics

- Supports face or voice biometric modalities, fused or in series
- Optimized on the most diverse data sets in the world
- Leverages cutting-edge privacy and security best practices

AwareID is designed with you in mind.

It's functional from the start with plug and play **AwareID** APIs and SDKs for web or mobile, and affordable for any size business. It's time to authenticate, transact, and protect.

AWAREID

Hey, have you heard?

There's a huge new authentication offering from Aware, and it's incredible!

The new AwareID adaptive authentication platform will change the way you establish trust with your customers.

MEET TED.

As a Compliance Manager at a growing online gaming company, he's looking for faster and easier ways to ensure new customers are who they say they are. With AwareID, doing Ted's job just got a whole lot easier! Ted uses AwareID to compare customer IDs to selfies and voice phrases – everything is done online, and AwareID confirms customers' identities for him, including crosschecking PEPs and Sanctions lists. AwareID is used beyond customer onboarding at the gaming company. It handles Ted's authentication needs as well, providing secure, age-verified access to funds and accounts for all of his iGaming customers.

AND HERE IS TRACY.

She's the Director of Risks and Payments. Tracy's company just began operations in a new state with exciting incentives for new customers! Unfortunately, Tracy believes fraudsters are taking advantage of the offer and enrolling many times over. Fortunately for Tracy, she has partnered with AwareID and can biometrically search for any duplicate customers in the system, eliminating fraud before it becomes a problem. And with AwareID's advanced data security capabilities, Tracy sleeps well at night knowing her customer's PII (Personal Identifiable Information) is secure.

Whether you're a Compliance Manager, like Ted; or manage risks and payments, like Tracy, you will find that AwareID is the ultimate tool to streamline and simplify your onboarding and authentication needs.

Welcome to the future of authentication. Try AwareID today.
