PLATFORM

Examples

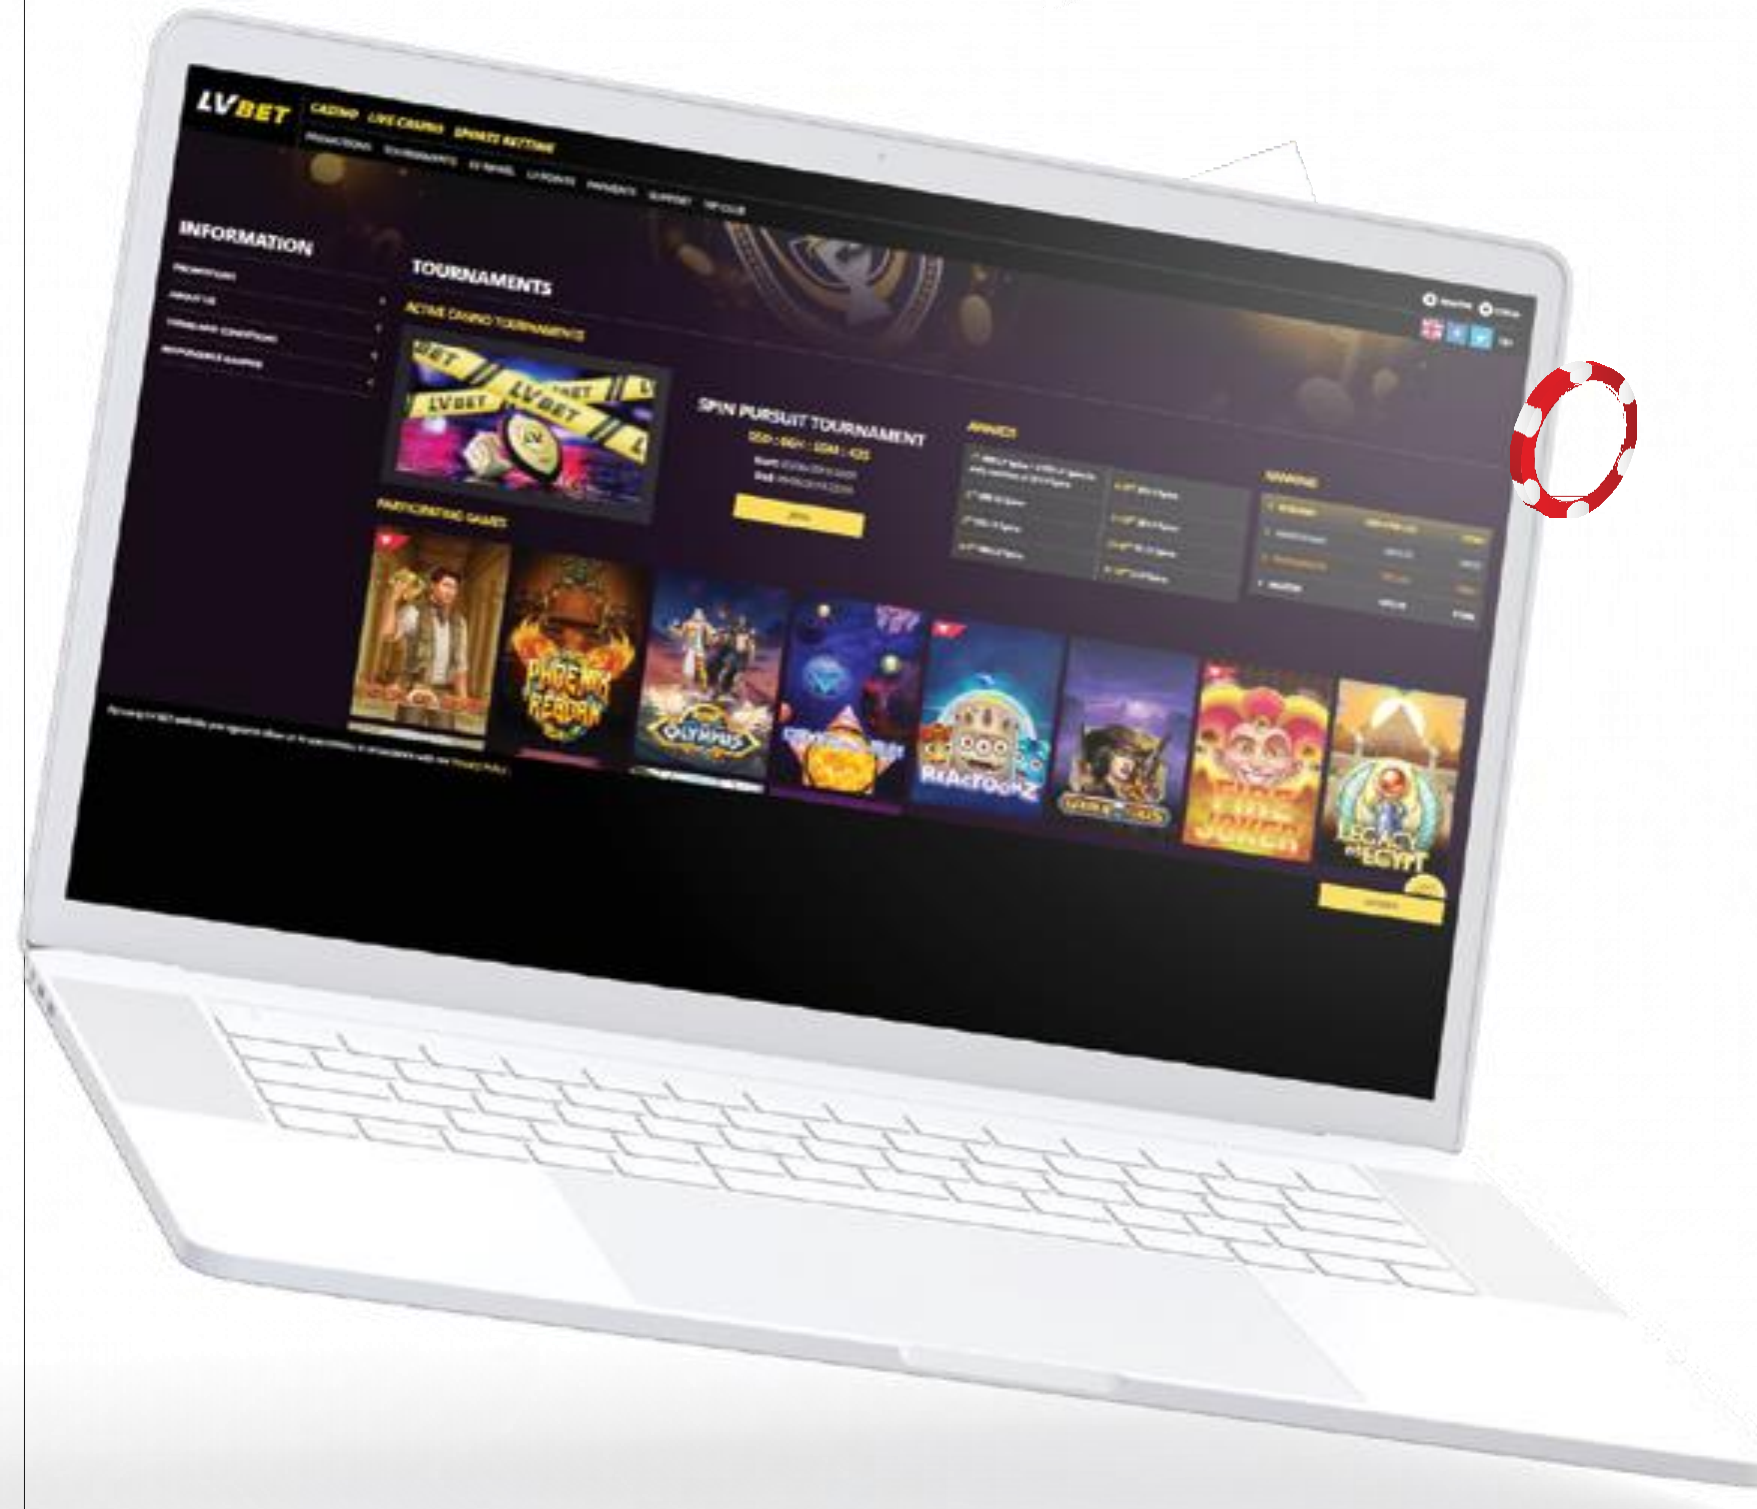

Online casino platform

The BF online casino platform gives clients the advantages they need to be successful in a competitive market by maximising player lifetime value and increasing revenues, while using automation to reduce labour costs.

Our platform is a turnkey solution, the platform allows clients to effectively target players, provide the very best benefits 'on the spot', and easily optimise valuable marketing budgets.

To maximise player engagement and retention, the platform offers a wide range of features and promotions, including free spins, jackpots, tournaments, a wheel of fortune and even a loyalty points system offering players the chance to earn bonuses, money and physical gifts from a special shop.

Casino Games

BF Games is a modern game development studio whose aim is to bring new quality products into the existing legacy gaming market.

Our creative team works in close cooperation with leading gaming providers to create state of the art slots that attract millions of players every day.

We provide extensive game design and implementation from scratch, with the conversion of land-based games to our online, high-performance Game Server.

The well-known and much-loved, innovative bonus features in our slots stand out among the competition. We offer over 50 sophisticated video slots for mobile, online and slot machines. So, just ask for a game-type, we're likely to have it – if we don't, we'll create it for you!
