Gaming Industry Solutions

About Beyond Bancard

Beyond Bancard is a full-service payments provider specializing in secure, scalable payment processing solutions for the regulated gaming industry. We deliver payment processing, gateway technology, and treasury management solutions across all regulated gaming verticals throughout North America and select international markets.

Through our network of direct acquiring banks and strategic banking partners, we provide merchant account solutions for gaming operators and platform providers while also assisting with the establishment of deposit banking accounts to support efficient treasury management.

Our comprehensive payments ecosystem supports the entire player payment lifecycle with flexible player-friendly deposit and payout options, including card payments, ACH, real-time payment solutions, and other alternative payment methods. Our enterprise-grade gateway infrastructure is equipped with advanced fraud prevention, risk management, and chargeback mitigation tools that help maximize approval rates, reduce fraud losses, and optimize operational performance while delivering a seamless payment experience.

Our Services

Reporting & Analytics

Provides operators with real-time reporting and analytics tools, which allow for the monitoring of transactions and individual payment methods to optimize online payment acceptance, as well as enhanced security to protect player and operator data.

Reliable Security

All of our systems are PCI Level 1 compliant and meet the highest global standards. Whether it is integrated Fraud Tools & Transaction Monitoring, Tokenization and Point-to-Point Encryption, or Chargeback Reporting and Management, all you have to do is plug in.

Omni-Channel Technology

Merchants can accept payments from anywhere, whatever the type, channel, or device. Our integrated technology and payment reporting tools enable a seamless experience across channels.

Service & Support

Our dedicated customer service team and integration specialists are available at all times to ensure that you get the answers and support that you need.

Banking & Treasury / FX Management

Key Benefits

- Single application for all payment methods.
- Advanced Fraud Suite including RDR, 3DS, fraud alerts, chargeback mitigation support.
- Multiple Payment Methods for Deposits and Payouts
- Boost player conversion rates by ensuring easy depositing and payment acceptance rates are optimized.
- Dedicated Account Management and Integration Support.
- Platform Security - Tokenization technology that protects players data. This includes multiple layers of protection to prevent chargebacks before they happen, and helps mitigate damage caused by executed chargebacks.

Proprietary Payment Gateways

NMI payment gateway includes integrated 3DS technology which adds a layer of security to gaming transactions. It also includes integrated rapid dispute resolution, advanced fraud detection, and chargeback prevention tools.

NMI allows a seamless integration and global scalability that continuously evolves with the industry.

NMI includes multi-mid management and works for any business, from any bank source, with any endpoint. Our omni-channel platform encompasses the entire transaction and post-transaction process with a seamless user experience.
