White Label for Cash-Online Casino

Fils' B2C solution allows our clients to create and launch an iGaming website through a turnkey solution. Our Casino Suite is able to integrate online casino games and mobile games between the biggest content provider requested including FilsGame.

White Label for Tribes Social Casino

This is FilsGame's Social Casino. Players get access to a selection of free-to-play gambling-like or pure for fun games. This is a powerful marketing tool to help your tribe, attract new players to your products and core business operations. A successful back office allows you to share promotions and grow your player community.

Gaming Management Platforms

CRM and PAM modules are key parts of an online casino operation. We work with our partners to develop and constantly improve our technology. Our modular technology gives the perfect analytical and monitoring tool to always have your operation under control.

Game Studio

FilsGame is a Game Studio for leading brands in the gaming and iGaming industry. We start from the storyboard to create and build custom slot, table, crash and mini games. Based on your requirements, we create the layout, graphic assets, sounds, math and coding. FilsGame will follow the certification process and will help you integrate and publish the new-born game on the platform you contract.

Content Provider

FilsGame is a content provider operating into regulated markets with a catalogue of over 200 games. We produce our games in-house aiming to serve to our players the best gaming experience and entertainment time. Our games are integrated into over 300 casinos. Through a back office promotional tool, casinos can serve the best bonuses on our contents.
