

PDXSLOTS

RGS - Interactive Casino Content Supplier

Invest in the upside of continued North American iCasino legislation with none of the customer acquisition costs!

PROBLEM

Small to medium sized studios have content operators want but do not have the resources to standup an interactive division and need a way to monetize their games

VISION

- Work with 3 – 5 Studios on an exclusive full-service distribution basis
- Provide operators with the best content from each studio building a reputation for premium content within each “niche”
- Focus on direct integrations with operators over short term revenue goals

VALUE PROPOSITION

- For Operators, we only want to push the best content that will help them increase the LTV of their players.
- For Game Studios, we will have the content depth (and reputation) to push for promotion sponsorships, lobby placement, and player notifications.

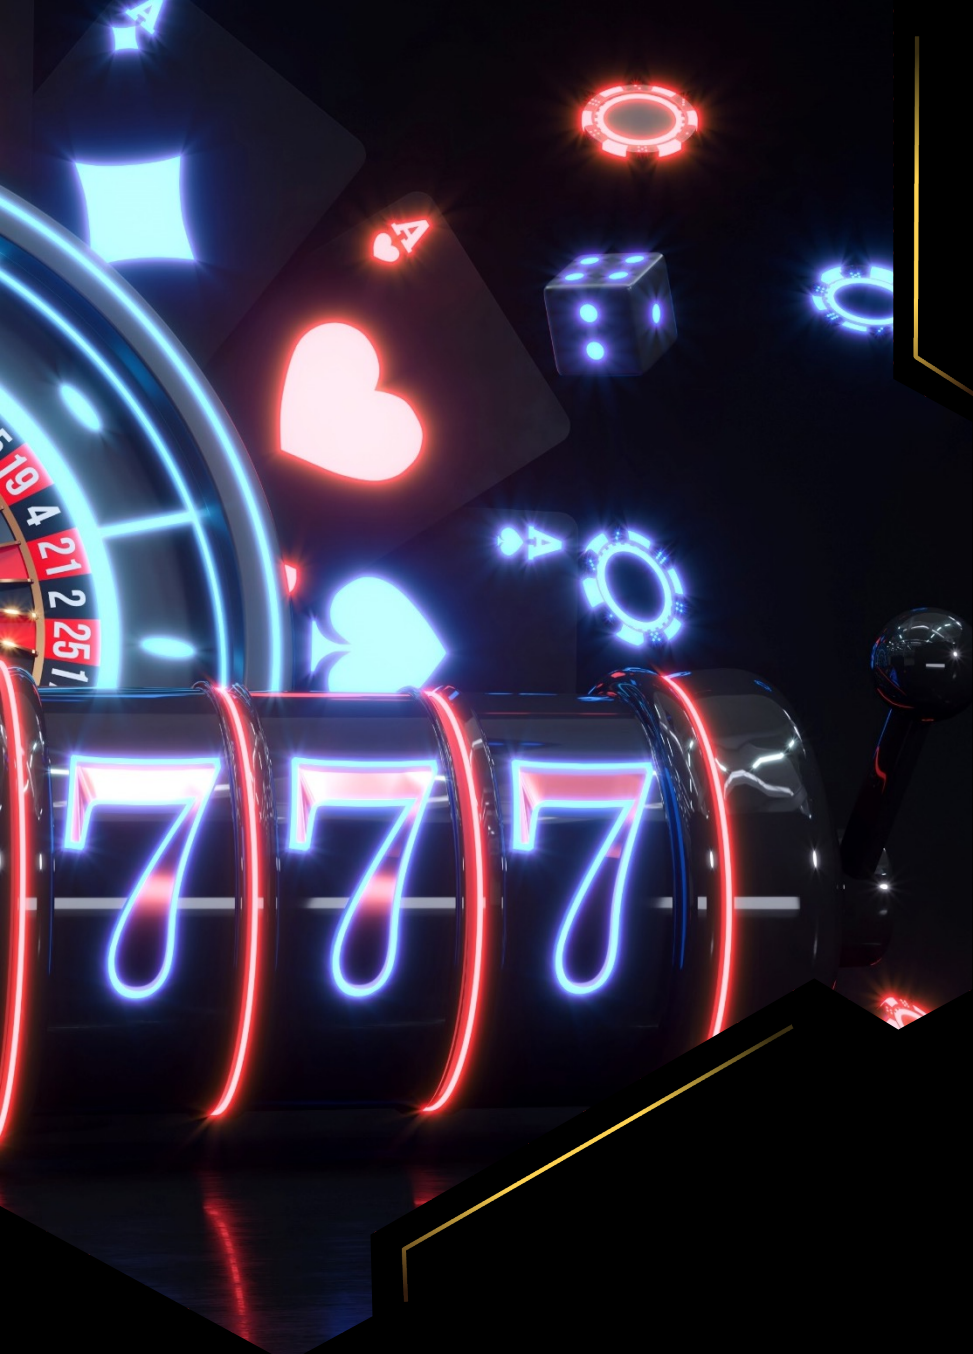

CONTENT-MAGEDDON

- ~70% of North American iCasino play is on an iOS device, App Store requirements force all content to be built into the app package.
- Limiting content libraries to 200 - 400 games total
- A “Full Service” approach allows us to only push content we validate in smaller releases and trust will be above average

TRACTION

- GLI Michigan approval, kept the project open to make quick changes to ease partner integrations
- Advisory contract with SCCG Management to provide introduction to Operators we do not have relationships with & help find potential high value content partners
- Michigan License Submission – want sufficient cash reserves before submitting
- Signed LOI from Rush Street Interactive to apply for gaming licenses
- Signed Big Wave Gaming as a content partner

24 MONTH TARGET

Remote Game Server
approved in 5 Jurisdictions

3 Partner Game Studios

Direct Integrations with 70%
of US RMG Operators
